

Test Plan

Test Plan – SauceDemo

1. Project Overview

This project contains manual testing documentation for the SauceDemo web application.

The goal of testing is to verify the main user flows, including login, product browsing, cart management, checkout process, navigation, session behavior, and basic usability.

2. Application Under Test

Application: SauceDemo

URL:  [Swag Labs](#)

Test type: Manual functional testing

Tester: Sara Fira

3. Test Scope

The following areas are included in testing:

- Login functionality
- Products page
- Cart functionality
- Checkout process
- Navigation and session behavior
- Basic usability checks

4. Out of Scope

The following areas are not included in this test cycle:

- Performance testing
- Security testing
- API testing
- Database testing
- Cross-browser testing on multiple browsers
- Mobile device testing

5. Test Approach

Testing will be performed manually based on prepared test scenarios and test cases.

Each test case will include:

- test case ID
- module
- priority
- preconditions
- test steps
- expected result
- execution status
- notes

6. Test Environment

Device: Desktop

Browser: Chrome

Operating system: Windows

Internet connection: Stable home connection

7. Entry Criteria

Testing can start when:

- The SauceDemo application is available
- Test credentials are known
- Test scenarios and test cases are prepared
- Test environment is ready

8. Exit Criteria

Testing can be completed when:

- All planned test cases are executed
- Failed test cases are documented
- Found defects are reported
- Test summary report is prepared

9. Test Deliverables

- Test Plan
- Test Scenarios
- Test Execution Report

- Test Summary Report
