Mission

Explore the employee and linked ESS account lifecycle to identify unexpected validation, data consistency, permission, session, and usability issues that are not covered by the planned test cases.

Goals

- 1. Employee creation in PIM
- 2. ESS account creation and status changes
- 3. Data consistency between PIM, User Management, and My Info
- 4. Admin and ESS permissions
- 5. Login and logout behaviour
- 6. Unexpected navigation and validation behaviour

Defects

OHRM-1, OHRM-2, OHRM-3, OHRM-4,
OHRM-5

A 45-minute exploratory session was completed according to the defined mission and goals.

The following areas were explored:

1. Employee creation in PIM.
2. ESS account creation and status changes.
3. Data consistency between PIM, User Management, and My Info.
4. Admin and ESS permissions.
5. Login and logout behaviour.
6. Unexpected navigation and validation behaviour.

Observations:

1. No validation message was displayed after selecting an unsupported profile picture format.
2. An invalid Date of Birth value could be saved.
3. Personal Details updated in My Info were not synchronized with PIM.
4. An ESS user could access User Management through a direct URL.
5. A disabled ESS account could still be used to log in.

All identified issues were reproduced and documented as Jira defects.
