

Test Summary Report

1. Testing Period

1	Testing Period:
2	26.05.2026 - 31.05.2026

2. Testing Scope

The following modules were covered during testing:

- Login functionality
- Products page
- Cart functionality
- Checkout process
- Basic navigation and UI behavior

3. Test Execution Results

Metric	Result
Total test scenarios	56
Executed tests	56
Passed	0
Failed	0
Blocked	0

4. Major Defects Found

No defects were found during this test cycle.

No bug reports were created.

5. General Observations

- Application is generally stable during standard user flows
- Error handling is visible and understandable
- Core e-commerce functionality works correctly

6. Conclusion

Manual testing of Sauce Demo application was completed successfully.

Most core functionalities behaved as expected, no functional and UI issues were identified and documented in Jira.

The application is suitable for continued testing and QA practice purposes.
